DESCRIPTION

As of May 2010, 25 states have state-level purchase of agricultural conservation easement (PACE) programs. Five states—Arizona, Georgia, Hawaii, New Mexico and Texas—have authorized PACE but do not yet have programs. Montana had a state-level program that was discontinued in 2003 when state authorization expired. This table displays the status and summarizes important information about farm and ranch land protection programs in 26 states that have funded easement acquisitions. For a program to be included, the protection of agricultural lands must be one of its core purposes, accomplished primarily by compensating landowners for the value of the easement.

Some programs (e.g., Delaware and Massachusetts) purchase and hold easements directly. Others also have the authority to acquire and co-hold easements with partners (e.g., county governments). A few programs (e.g., New York and Virginia) only provide grants to eligible entities, such as local governments and land trusts, to buy easements. In Alabama, the state's role is limited to holding and monitoring easements; other entities execute the projects.

**EXPLANATION OF
COLUMN HEADINGS**

Year of Inception / Year of First Acquisition

“Year of Inception” is the year in which the law authorizing the PACE program passed. “Year of First Acquisition” is the year in which the program acquired its first easement.

Easements or Restrictions Acquired

Number of agricultural conservation easements or conservation restrictions acquired through the state program. This number does not necessarily reflect the total number of farms/ranches protected because some programs acquire a property in stages and/or may hold multiple easements on the same farm/ranch. Some state programs do not

hold easements but instead provide funds for easement purchase to local governments or land trusts.

Acres Protected

Number of acres protected by the program to date.

Program Funds Spent to Date

Dollars spent by each program to acquire easements on farms/ranches. This amount may include unspent funds dedicated for installment payments on completed projects. Unless otherwise noted, these figures do not reflect incidental land acquisition costs, such as appraisals, insurance and recording fees, or the administrative costs of running the program. These figures do not include additional funds contributed by federal programs, local governments (counties and municipalities), private land trusts, foundations and/or individuals.

Additional Funds Spent to Date

Funds contributed toward state program acquisitions by federal programs, local governments, private land trusts, foundations and/or individuals (see “Funding Sources Used to Date” below).

Program Funds Available

Program funds available for the current fiscal year to acquire easements on agricultural land.

Program Funds Available Per Capita

Program funds available per capita are based on state population estimates for 2009 from the U.S. Census Bureau.

Outstanding Applications

Backlog of applications reported by program administrators.

Funding Sources Used to Date

Sources of funding for each program. “Transportation funding” refers to federal money

PURCHASE OF AGRICULTURAL CONSERVATION EASEMENTS

PROGRAMS

For additional information on farmland protection and stewardship contact the Farmland Information Center. The FIC offers a staffed answer service and online library with fact sheets, laws, sample documents and other educational materials.

www.farmlandinfo.org

(800) 370-4879

disbursed under The Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005 and its predecessors for “transportation enhancements.” Easement acquisitions that protect scenic views and historic sites along transportation routes are eligible for these funds.

The Army Compatible Use Buffer (ACUB) Program provides funds to establish easement-protected buffer areas around military installations.

The federal Farm and Ranch Lands Protection Program (FRPP) provides matching funds to state, local and tribal governments and certain non-governmental organizations to purchase agricultural conservation easements. The 2008 Farm Bill authorized \$743 million for the FRPP through fiscal year 2012.

In addition to these sources of funding, several programs reported contributions from private sources.

NOTES

[Δ] Program activity includes fee simple acquisitions of agricultural land. Great Outdoors Colorado grant recipients are required to resell land acquired in fee subject to a conservation easement.

[^] “Program Funds Spent to Date” includes incidental land acquisition costs and/or personnel costs.

[-] Figure carried forward from previous PACE tables.

[X] Program has terminated or is no longer acquiring agricultural conservation easements.

[□] “Program Funds Available” includes money for other land conservation purposes.
